SUMMARY

Senior product designer with 8+ years in UX, product and learning design, 5+ of them in UX and product design roles, focused on B2B SaaS, data-heavy and AI products. I own the work end to end, from problem framing and flows to UI, working prototypes and rollout. I have led the design of an AI analytics platform live at LG Ad Solutions, a white-label agentic AI platform now on the market, and an offline-first field app used in 18 of Argentina's 24 provinces. I prototype daily with Claude, Lovable and Figma MCP, interview and test with users, read PostHog data, design accessible interfaces to WCAG, and lead a team of 3 designers. A degree in learning psychology shapes how I design for trust and adoption.

EXPERIENCE

CLEAR TECH Data and AI consultancy

Product Design Lead (official title: UX Design Lead) Oct 2023 – Present

I lead product design, mostly on AI and data products, test with users and work closely with developers.

- **Gradient, LG Ad Solutions:** led product design of an AI analytics platform where agents answer questions and build dashboards: a home for each role, an agent marketplace and a dashboard builder where every agent change is explained, confirmed and undoable. Ran think-aloud usability sessions with LG account managers before each release; with engineering and data, turned real manager questions into a review set every AI answer had to pass. Co-built the token system under every agent (Figma Variables, Tokens Studio, Style Dictionary, Storybook), checked with Stark and axe. Live at LG; per LG's public case study, campaign reports went from 2–3 days to 2 seconds.
- **Pengui:** led product design of a white-label agentic AI platform that runs in each client's cloud, from the product definition with the founder and engineers to a five-step agent builder, per-capability permissions, answers that cite their sources and approval before any action. On the market, adopted by companies including LG.
- **CAMMESA:** set the product strategy and directed the design of a new portal for the agents of Argentina's wholesale electricity market, whose system settles 95% of the country's electricity; a designer on my team produced the screens with AI tools under my feedback. Dev-ready, now in development.
- **Biomás:** led design of an offline-first field app live in 18 of Argentina's 24 provinces, with a flow for each role and strict compliance rules. Research with its users: weekly video calls with field reps, phone interviews with collectors and a field visit I planned and debriefed with a junior designer, synthesized in empathy maps and a mental-model matrix. Wrote the quick-start guides that supported its adoption.
- **Changent:** led design of a human-in-the-loop retention agent for home-visit nurses, shaped with Clear Tech's domain experts on the account: nurse and supervisor views where the agent explains each flag and drafts an approach the nurse decides on. Built the working prototype with AI; Phase 2 approved.
- Built the company's design system (tokens, components, data and AI patterns, templates) and packaged it as a Claude skill used company-wide; it runs clear-tech.com, which I redesigned to meet WCAG and refined with PostHog data.
- Set dashboard UX standards for a global tech company with a 96-page guide, and designed dashboards for healthcare and real estate clients.
- Built prototypes for 15 sales pitches with Claude, Lovable and Figma MCP, some of them functional. For an enterprise bank, turned one discovery call into a proposal and a seven-screen prototype for a court-funds platform: I set the flows, rules and copy and checked every AI-generated screen. The deal closed.
- Lead and mentor 3 designers; built the design practice from scratch (skill matrix, frameworks, quality standards, a clear handoff to developers) and brought AI tools into the team's daily work.

Senior Learning Experience Designer Apr 2022 – Oct 2023

- Helped B2B clients adopt data products: led the adoption strategy for LinkedIn People Analytics' move from Tableau to Power BI, aligned to LinkedIn's design system, and turned SQL concepts into data-literacy training for non-technical staff (Nurse-Family Partnership).

DIRECTV LATIN AMERICA

UX Content Designer Oct 2021 – Apr 2022

- Designed chatbot and IVR flows, self-care apps and e-commerce for sales and self-service across Latin America, applying behavioral design to reduce drop-off in sales and onboarding funnels.
- Ran A/B tests with researchers on CSAT, NPS and conversion; built UX standards that unified the experience across countries and platforms.

GLOBANT

Digital Marketing Consultant Jul 2020 – Oct 2021

- UX content and research for global clients: defined the end-to-end content strategy for DIRECTV LATAM's app, e-commerce, landing pages and chatbots, and led user research with medical experts to define Novartis's digital engagement roadmap.

ACCENTURE

Learning Experience Designer Aug 2019 – Jul 2020

- Led the HR and Project Management learning tracks of an SAP S/4HANA rollout reaching 25,000+ employees, and moved the nationwide training plan to 100% virtual during COVID-19.

ROEMMERS

UX Designer Jr May 2018 – Jul 2019

- UX and content for a medical management platform and pharma landing pages, under strict regulation.

LEADERSHIP & MENTORING

UX WRITING HUB

Mentor Dec 2021 – Nov 2025

- Mentored aspiring designers on information architecture, content strategy and behavioral psychology, and guided their portfolios.

EDUCATION

PONTIFICIA UNIVERSIDAD CATÓLICA ARGENTINA

Postgraduate Degree in Adult Learning Psychology (Psicopedagogía Laboral) 2017

UNIVERSIDAD DEL SALVADOR

Bachelor's Degree in Learning Psychology (Licenciatura en Psicopedagogía) 2012 – 2016

Courses: UX/UI Design, Coderhouse (2018–2019); Branding and Graphic Design, Coderhouse (2024–2025); Art Direction, Haus Argentina (2025).

SKILLS, TOOLS & CERTIFICATIONS

Product design: End-to-end UX/UI, interaction design, information architecture, dashboards and data visualization, rapid prototyping, native mobile (Material Design) and responsive web.

Research and validation: User interviews, field research, think-aloud usability testing, A/B testing, co-design workshops, empathy maps, mental-model mapping, product analytics and session replays.

AI-assisted design: Functional AI prototypes, agent UX, human-in-the-loop design, AI output evaluation, Claude Skills and MCPs.

Design systems and accessibility: Design tokens, component libraries, documentation, design-to-code handoff, WCAG 2.2 AA.

Content: UX writing, content strategy, conversational design (chatbot and IVR), quick-start guides and adoption material.

Leadership: Leading and mentoring designers, design operations, workshops with product, engineering and sales.

Tools: Design Figma (components, variables, auto layout, prototyping), Illustrator. **AI** Claude, Claude Code, Figma MCP, Lovable, v0, Midjourney, Veo. **Research and analytics** PostHog, Maze, Dovetail, Loom. **Systems and accessibility** Tokens Studio, Style Dictionary, Storybook, Stark, axe. **Data** Power BI. **Delivery** GitHub, Vercel.

Languages: English (full professional), Spanish (native).

Certifications: Claude Academy: AI Fluency, Framework and Foundations; Claude Academy: Building Effective Human-Agent Teams.
